PROFESSIONAL SUMMARY

Data Engineer and Analytics Engineer with 4+ years of experience building scalable data platforms, ETL pipelines, and business intelligence solutions using Snowflake, dbt, AWS, and Tableau. Experienced in working with stakeholders to understand business requirements and designing reporting solutions using Snowflake's Medallion architecture, with a focus on building Gold Layer tables, views, and automated tasks for analytics and reporting. Skilled in developing Tableau dashboards and reporting solutions by transforming business requirements into reliable, scalable data models and workflows. Additionally building and deploying full-stack SaaS products with modern technologies including Next.js, Supabase, PostgreSQL, and Vercel. Strong interest in AI-assisted development, product engineering, workflow automation, and scalable system design.

TECHNICAL SKILLS

Data Engineering: Snowflake, SQL, dbt, Apache Airflow, ETL Pipelines, Data Modeling, Data Warehousing

Cloud & Infrastructure: AWS, Azure, Vercel, Supabase

Programming: Python, SQL, JavaScript, TypeScript

Frontend & Backend: Next.js, REST APIs, Authentication Systems

Databases: PostgreSQL, MySQL, SQL Server

Analytics & Visualization: Tableau, SSRS

Payments & Integrations: Razorpay, Resend, Google Meet Integrations

Developer Tools: GitHub, Bitbucket, Jira, Confluence, Cursor, Claude Code

AI & Automation: AI-assisted Development, Prompt Engineering, Workflow Automation

PROFESSIONAL EXPERIENCE

TechStyle / Fabletics

March 2025 – Present

Data Engineering Analyst

Hyderabad, India

- Build and maintain reporting-ready Gold Layer models within Snowflake Medallion architecture, transforming raw and curated datasets into scalable business reporting structures.
- Develop ETL pipelines and orchestration workflows using Apache Airflow and Snowflake Tasks to automate reporting and dashboard refresh processes.
- Create Tableau dashboards supporting retail, membership, customer, and operational analytics across multiple business domains.
- Perform end-to-end data QA, validation, and reconciliation to ensure reporting accuracy and consistency across analytical systems.
- Collaborate with cross-functional teams to translate business requirements into optimized SQL transformations and reporting solutions.
- Improve ETL reliability and warehouse performance through query optimization and scalable transformation design.

Innova Solutions

April 2023 – February 2025

Data Engineering Analyst

Hyderabad, India

- Built and managed scalable data warehouse workflows using Snowflake, AWS, Tableau, SQL Server, and dbt.
- Designed ETL pipelines integrating data from S3, SQL Server, APIs, and enterprise systems into Snowflake environments.
- Developed reporting tables and business transformation layers supporting analytics and operational reporting use cases.
- Built Tableau dashboards delivering KPI visibility and actionable business insights for stakeholders.
- Automated reporting workflows using Apache Airflow, Power Automate, and SSRS integrations.
- Performed QA validation and testing for reporting logic updates to ensure data quality and stakeholder trust.

Innova Solutions

August 2022 – February 2023

Data Engineer

Hyderabad, India

- Worked on inventory and supply chain analytics systems for a US-based wine manufacturing client using Azure, SQL Server, and .NET integrations.
- Enhanced stored procedures and forecasting workflows for demand prediction and inventory planning scenarios.
- Developed ETL processes supporting logistics, production, and inventory reporting requirements.
- Built dashboards and backend reporting systems for demand scenario testing and operational analytics.

PROJECTS

Taskopus — Service Marketplace & Workspace Collaboration Platform | *Next.js, TypeScript, Supabase, PostgreSQL, Vercel*

- Built and deployed a live full-stack SaaS platform enabling users to list services, post tasks, book professionals, and manage client collaboration workflows.
- Developed dedicated workspace systems supporting booking management, recurring engagements, meeting scheduling, file sharing, and collaboration features.
- Implemented marketplace functionality for local services including househelp, plumbing, coaching, and freelance task-based workflows.
- Integrated Razorpay payment workflows for service bookings and subscription handling.
- Built real-time chat and communication systems supporting user-to-user interactions and workspace collaboration.
- Implemented authentication, backend APIs, database architecture, and deployment pipelines using Supabase and Vercel.
- Integrated Resend for transactional emails and notification workflows across the platform.
- Leveraged AI-assisted development workflows using Cursor and modern AI tooling to accelerate feature delivery and product iteration.

EDUCATION

Sreenidhi Institute of Engineering & Technology	2018 – 2022
<i>B.Tech in Computer Science and Engineering CGPA: 7.6</i>	<i>Hyderabad, India</i>
Narayana Junior College	2016 – 2018
<i>Intermediate 96.8%</i>	<i>Hyderabad, India</i>
